10. Convenient times available day and night.

WHAT IS A LEAGUE?

- * The term "League" really means a social club; one whose main activity is tenpin bowling, not necessarily it's only activity-but it's main one.
- * Leagues bowl every week on the same day at the same time, so every member has a regular social occasion on their calendar.
- * League affairs are conducted by officers selected by the members, or by bowling centre management and staff. Leagues follow established rules, and can add their own when necessary.
- * A League organizes it's season so that every team plays every other team at least twice, according to a draw. In this manner, members get to know each other in the nicest possible way—by bowling together. At the end of each season, trophies, prizes etc.. Are handed out for a variety of awards to members usually at a social evening.

* New members are always welcome in a League, after all— it means new friends for everybody. As all social leagues are handicapped, the lower a bowler's average game, the higher their handicap, so a team's competitive chances are not affected by adopting a new member.

* Finally, don't be worried if your average game is low—you will be surprised to find out how many current members have lower averages and with just a bit of coaching, you will be amazed at how quickly your game will improve.
